SECTION 01

About Focsera Labs

A year-long Saturday skills program that turns schools into creator academies.

What is Focsera Labs?

Focsera Labs is a structured, school-integrated Future Skills Program for students in Classes 6 to 12. Every Saturday, students attend 4-hour skill sessions in design, video editing, AI tools, content creation, podcasting, and entrepreneurship — delivered by trained working professionals, not classroom teachers. Schools don't manage it. We handle everything end-to-end.

60 Total Events	3 Grade Groups	4 Terms / Year	4 hrs Per Session
---------------------------	--------------------------	--------------------------	-----------------------------

Our Vision

To make every student in India digitally skilled, creatively confident, and career-ready before they graduate — not after.

Our Mission

To partner with schools and run a high-quality, consistent, measurable skills program that parents trust, students love, and school management is proud of.

The Problem We Solve

- **Schools:** Want to offer skill programs but lack trainers, content, tools, and execution capacity.
- **Students:** Want to learn real skills but don't know where to start or what tools to use.
- **Parents:** Want to see a return on their child's education beyond marks and memorisation.

Who Benefits?

For Students	For Schools	For Parents
• Real digital skills • A portfolio of 15–20 projects • Badges & certificates • Competition & recognition • Tools used by professionals	• Zero effort — we handle everything • Branded as innovation leader • Social media visibility • Parent trust & retention • Annual showcase event	• Visible skill development • Portfolio they can share • No hidden costs • Safe, structured environment • Career-ready child

SECTION 02

Program Overview

A structured, Saturday-based learning model built for schools.

Grade-wise Structure

Grade Group	Classes	Focus Area	Key Themes
Category 1	Classes 6 & 7	Creative Exploration	Canva, Photography, Illustration, Reels, Storytelling, AI Basics
Category 2	Classes 8, 9 & 10	Skill Development	Video Editing, UI/UX, Branding, Content Strategy, Podcasting
Category 3	Classes 11 & 12	Career Launch	Freelancing, Prompt Engineering, Startup Pitch, Portfolio Building

Session Count by Plan

Plan	Total Sessions	Sessions / Term	Terms	Best For
Basic Starter	5 Sessions	5	1 Term	Trial / Short Pilot
Standard Skill Program	15 Sessions	3–4	3 Terms	Full Academic Year
Premium Innovation	20 Sessions	5	4 Terms	Complete Year + Showcase

SECTION 03

Subscription Plans

Three tiers designed to fit different school budgets and ambitions.

Feature	Basic Starter	Standard Skill Program	Premium Innovation
Events per Year	5	15	20
Session Duration	4 Hours	4 Hours	4 Hours
Fee per Student	Rs. 1,500–2,000	Rs. 3,000–3,500	Rs. 4,500–5,000
Trained Trainer	✓	✓	✓
Workshop Content	✓	✓	✓
Posters & Marketing Material	✓	✓	✓
Session Certificates	✓	✓	✓
Photography	—	✓	✓
Social Media Reels	—	✓	✓
Competitions & Badges	—	✓	✓
Professional Videography	—	—	✓
Annual Showcase Event	—	—	✓
Premium Certificates	—	—	✓
Branding Kit (Bag, Workbook, Wear, Goodies)	Add-on (paid)	Add-on (paid)	✓ FREE
Recommended For	Pilot / Trial	Most Schools	Innovation Leaders

Tip for Schools: The Standard Plan is the most popular choice. It covers the full academic year with photography and social media reels — all at a fee that fits comfortably into a school's annual program budget.

SECTION 04

Tools Required

Software to install on school lab computers before the program begins.

Why This Section Exists

All tools listed below are free or free-to-use for students. Focsera will assist the school IT team with setup during the onboarding visit. Each tool below must be installed or accessible as a browser bookmark on every lab computer before Session 01 begins.

Core Tools — Required for All Grade Groups

Tool	Type	Used For	Install / Access	Cost
Canva (canva.com)	Browser / App	Design, posters, logos, infographics, presentations	Browser bookmark or app install. Create free Canva for Education account.	Free
CapCut (capcut.com)	App / Browser	Video editing, reels, transitions, text animation	Desktop app install preferred. Browser version available.	Free
Google Chrome	Browser	Primary browser for all web-based tools	Install latest version. Set as default.	Free
Google Drive	Browser	Student portfolio storage, file sharing, session reports	Log in with school Google account. Create shared class folders.	Free
Google Slides	Browser	Presentations, pitch decks	Accessible via Google Drive — no separate install.	Free
Snapseed	Mobile App	Photo editing on phones	Students install on personal phones.	Free
ChatGPT (chat.openai.com)	Browser	AI prompting exercises, content generation	Browser bookmark. Free tier is sufficient.	Free
Adobe Express (express.adobe.com)	Browser	Quick design, social media graphics	Browser bookmark. Free for students.	Free

Additional Tools — Classes 8–10 (Skill Development)

Tool	Type	Used For	Access	Cost
Figma (figma.com)	Browser	UI/UX design, app wireframes, prototypes	Browser. Create free Education account.	Free
DaVinci Resolve	Desktop App	Advanced video editing, colour grading	Download from blackmagicdesign.com — install on lab PCs.	Free

Tool	Type	Used For	Access	Cost
Spotify for Podcasters (podcasters.spotify.com)	Browser	Podcast recording, publishing	Browser. Students create free accounts.	Free
Piktochart (piktochart.com)	Browser	Infographic and data visualisation	Browser bookmark.	Free
Hemingway Editor (hemingwayapp.com)	Browser	Copywriting, readability checks	Browser bookmark.	Free

Additional Tools — Classes 11 & 12 (Career Launch)

Tool	Type	Used For	Access	Cost
Figma (figma.com)	Browser	Full UX prototyping, clickable flows	Browser. Edu account.	Free
DaVinci Resolve	Desktop App	Cinematic editing, LUTs, colour grading	Lab PC install.	Free
Notion (notion.so)	Browser / App	Business model canvas, planning docs, portfolio	Browser. Free for students.	Free
LinkedIn (linkedin.com)	Browser	Personal branding, professional profiles	Browser. Students create accounts.	Free
Canva AI / Image Generator	Browser	AI image generation, design prompts	Inside Canva — no extra install.	Free
ElevenLabs (elevenlabs.io)	Browser	AI voiceover for content creation	Browser bookmark.	Free (limited)
Runway ML (runwayml.com)	Browser	AI video generation, background removal	Browser. Free tier.	Free (limited)

IT Setup Checklist for School

- All lab computers have Google Chrome installed and updated to latest version
- Canva for Education school account created — all student emails added
- CapCut desktop app installed on all lab PCs
- DaVinci Resolve installed on all lab PCs (Classes 8–12 only)
- Figma browser bookmark saved on all lab PCs (Classes 8–12 only)
- Shared Google Drive folder created: 'Focsera Labs 2025 — [School Name]'
- Sub-folders created per grade: Grade 6-7 / Grade 8-10 / Grade 11-12
- School WiFi password shared with Focsera coordinator before Session 01
- Projector and HDMI cable tested and working in the session classroom
- Focsera coordinator has physical access to the computer lab on Saturdays

Note: Focsera's coordinator will visit the school one week before Session 01 to complete the IT setup checklist, test all tools, and ensure everything is working. This visit is included in all plans at no extra charge.

SECTION 05

Weekly Execution Plan

How every Saturday is structured — from morning to evening.

Saturday Time Slots

One Focsera trainer and one coordinator visit the school every Saturday. The day is divided into three 4-hour sessions — each serving a different grade group. Sessions are consecutive with short breaks between them.

Time Slot	Grade Group	Focus	Duration
Morning 9:00 AM – 1:00 PM	Classes 6 & 7	Creative Exploration	4 Hours
Afternoon 2:00 PM – 6:00 PM	Classes 8, 9 & 10	Skill Development	4 Hours
Evening (alternate Saturdays)	Classes 11 & 12	Career Launch	4 Hours

Roles on a Saturday

Role	Responsibility	Paid By
Trainer	Delivers all session slots. Teaches, guides, coaches students individually. Fills session report.	Focsera
Coordinator	Manages logistics, photography, badge/certificate distribution, Google Drive uploads. School POC.	Focsera
School POC	Opens classroom and lab, shares attendance list, available on-site during sessions.	School

Full Day Checklist

When	Action	Who
Day Before	WhatsApp reminder to school coordinator with session topic and materials needed	Ops Team
Day Before	Trainer confirms attendance, reviews session plan, prepares physical examples	Trainer
T-30 min	Trainer and coordinator arrive. Projector tested, playlist queued, materials laid out	Both
T-10 min	Coordinator at gate to welcome and direct students to the lab	Coordinator
T+0	Session begins — warm-up prompt displayed on projector	Trainer

When	Action	Who
T+60	TEACH block complete. Move to guided practice	Trainer
T+150	Break — 15 minutes. Coordinator checks photos taken so far	Both
T+165	Independent create begins — trainer coaches individually	Trainer
T+210	COMPETE block — voting, announcement, certificate/badge moment	Both
T+225	Portfolio drop — students save work to Google Drive folder	Coordinator
T+230	Hero photo — winner with certificate, group photo of all students	Coordinator
T+235	Session report filled by trainer on phone	Trainer
T+240	WhatsApp summary sent to school coordinator with 3 photos	Coordinator
Next Day	Reel edited and posted on Focsera Instagram	Ops Team
2 Days Later	Full photo gallery sent to school via Google Drive link	Ops Team

SECTION 06

Session Structure — 4 Hours

Every session follows the same structured framework. What changes is the depth and the topic.

Complete 4-Hour Session Breakdown

This is the exact time plan followed in every Focsera Labs session. Trainer scripts, exercises, and competition formats change per session topic — but the time structure never changes. This consistency helps students know what to expect and arrive mentally prepared.

Time	Phase	Trainer Does	Students Do
0:00–0:10	Arrival & Setup	Trainer sets up projector, plays upbeat background music. Coordinator distributes workbooks and materials.	Students arrive, settle, open workbooks, write date and session topic on first page.
0:10–0:20	Warm-Up Prompt	Trainer puts a creative question on the projector. Reads it aloud. Calls on 4–5 students for answers. Creates energy.	Students think and share answers. No wrong answers — this is about getting minds warmed up.
0:20–1:00	TEACH Block	Live skill demonstration with real before/after examples. Trainer explains the why, not just the how. Uses projector for visual walk-through.	Students watch attentively. Encouraged to ask 'why' questions. Jot key steps in workbook.
1:00–1:45	Guided Practice	Trainer does the task step by step on screen. Students follow along simultaneously. Trainer pauses to check progress.	Students replicate each step on their own device. Coordinator helps students who fall behind.
1:45–2:00	Break (15 min)	Trainer circulates, gives informal feedback, encourages the stuck ones, previews the competition format.	Students take a break, review work so far, make quick adjustments before independent phase.
2:00–3:00	Independent Create	Trainer steps back. Students work on their own version with full creative freedom. Trainer coaches one-to-one.	Students build their own final output. This is the real work. Trainer gives coaching, not answers.

Time	Phase	Trainer Does	Students Do
3:00–3:30	COMPETE Block	Displays top works on projector. Announces voting format. Counts votes. Announces winner. Hands out badge/certificate.	Students vote for the best work using peer voting cards or raised hands. Cheer for the winner.
3:30–3:45	Debrief & Feedback	Trainer gives 3-minute analysis: what made the winner stand out, what every student did well, one tip for next time.	Students listen, note the tip in workbook, ask final questions.
3:45–3:55	Portfolio Drop	Trainer reminds students to save and label their work: 'Name_Class_Session01_Title'.	Students save all files to the shared Google Drive class folder. Coordinator confirms uploads.
3:55–4:00	Group Photo & Close	Coordinator takes group photo. Trainer closes with a teaser for next session. Energy must be high.	Students pose for group photo. Winner does a solo shot with their certificate or badge.

Key Principle: Every student leaves every session with a finished output — not homework, not theory notes. A real piece of creative work that goes into their personal portfolio and can be shown to parents, printed, or posted online.

SECTION 07

Curriculum — Classes 6 & 7

Creative Exploration · 20 Sessions · 4 Terms · 4 Hours Each

Focus: Fun, hands-on creativity. Students discover what they enjoy making. Sessions are designed to feel like a creative playground — not a class.

All 20 sessions below follow the 4-hour structure from Section 06. The TEACH block content, PRACTICE exercise, and COMPETE format are described in full for each session.

SESSION 01

Badge: Brand Founder

Who Am I? — Personal Brand Poster

Tools: Canva

Objective: Students create a personal poster using Canva that tells the world who they are — their name, 3 interests, favourite quote, and dream.

TEACH Block (0:20 – 1:00)

- Open Canva and show the blank canvas. Explain layout grids — where to place a headline, image, and supporting text.
- Show 3 real examples: a bad layout (cluttered, wrong fonts), a good layout, and a great layout. Explain what makes the difference.
- Teach: Font pairing (one bold headline font + one clean body font). Colour psychology basics — what orange, blue, and green feel like.
- Demonstrate: How to upload a photo to Canva, resize it, and place it. How to add a colour overlay. How to pick a background.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer builds a sample poster live, step by step. Students follow along on their own Canva canvas.
 - Step 1 — Set canvas to A4. Pick a background colour or gradient.
 - Step 2 — Add their name as the headline. Pick a bold font. Make it large.
 - Step 3 — Add 3 text boxes listing their top 3 interests. Use a smaller font.
 - Step 4 — Add a photo (school photo, selfie, or Canva avatar). Frame it.
 - Step 5 — Add one favourite quote at the bottom in italic font.
- Independent (2:00–3:00): Students customise their poster fully. Trainer walks around, gives individual design feedback.

COMPETE Format (3:00 – 3:30)

- All posters displayed on projector gallery. Class votes: Most Creative Design / Best Font Combination / Most Colourful.
- 3 winners receive the 'Brand Founder' badge. All posters printed A4 and sent home with students as a gift for parents.

SESSION 02

Phone Photography Bootcamp

Badge: Sharp Shooter

Tools: Phone Camera, Snapseed

Objective: Students learn the 3 core rules of phone photography and shoot 10 photographs around the school campus.

TEACH Block (0:20 – 1:00)

- Show 10 pairs of photos on the projector: a bad shot vs a great shot of the same subject. Ask students: 'What's different?'
- Teach Rule 1 — Rule of Thirds: Show the 3x3 grid overlay. Explain how placing your subject on the grid lines creates better composition.
- Teach Rule 2 — Golden Hour Light: Show examples of harsh noon light vs soft morning/evening light. Teach to find window light indoors.
- Teach Rule 3 — Find the Frame: Show examples of shooting through doorways, windows, and arches to create depth.
- Bonus tip: Tap to focus on the subject, swipe to adjust exposure, lock focus before shooting.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Students go outside in groups of 4 and shoot the same 3 subjects: a plant, a doorway, and a person — applying each rule.
- Independent (2:00–3:00): Free shoot around school. Task: collect 10 best photos. Trainer circulates and gives real-time field feedback.
 - Must include: 1 rule-of-thirds shot, 1 framing shot, 1 light experiment shot, 7 free shots.
- Back in class: Students edit their top 3 photos using Snapseed — brightness, contrast, crop, and structure adjust.

COMPETE Format (3:00 – 3:30)

- Each student picks their single best photo. All photos displayed on projector as a gallery.
- Class votes: Best Composition / Most Creative Angle / Best Light.
- Top 5 photos printed and displayed on the school corridor wall as a permanent gallery.

SESSION 03

My Dream World — Illustration & Doodle Art

Badge: Doodle Creator

Tools: Canva, Phone Camera

Objective: Students create a richly illustrated A3 poster of their 'dream world' using Canva's illustration elements and their own doodles.

TEACH Block (0:20 – 1:00)

- Show 5 examples of illustrated world maps, fantasy maps, and student-created doodle art. Ask: what story does each one tell?
- Teach: How to use Canva's Elements panel — stickers, illustrations, line art, frames, and backgrounds.
- Teach: How to layer elements — background first, then mid-layer objects, then foreground details.
- Show: How to mix Canva elements with hand-drawn doodles — draw on paper, photograph it, upload to Canva, and use 'background remover' to make it transparent.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer builds a sample 'dream world corner' live — ocean, mountains, a house, a spaceship. Students build alongside.
- Independent (2:00–3:00): Students design their full dream world. Could be: a dream city, a fantasy island, outer space, underwater world.
 - Must include: A background landscape, at least 5 illustrated elements, their name written in a creative font, one doodle or hand-drawn detail.

COMPETE Format (3:00 – 3:30)

- Gallery display on projector. Class votes: Most Creative World / Most Detailed / Best Story Told Through Art.
- Top 3 printed A3 and displayed in class. All students take their digital file home in the shared Drive folder.

SESSION 04**30-Second Story Reel**

Badge: Reel Maker

Tools: CapCut, Phone Camera

Objective: Students write a 3-line script, shoot footage using their phone, and edit a 30-second story reel using CapCut.

TEACH Block (0:20 – 1:00)

- Play 5 reels on the projector. After each one ask: 'What was the hook? Did you want to keep watching? Why?'
- Teach the Reel Formula: Hook in 3 seconds → Story in 20 seconds → Surprise or punchline in 7 seconds.
- Show CapCut interface: importing clips, trimming, adding text, transitions, background music, and captions.
- Teach: How to shoot a selfie video with good light — face the window, hold phone at eye level, speak clearly.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer scripts and shoots a demo reel live in class. Students watch and give feedback on the hook.
- Independent (2:00–3:00): Students choose a topic (favourite food, dream trip, my pet, funniest school moment), write a 3-line script, shoot 3–5 clips, then edit in CapCut.
 - Required edits: at least 1 transition, 1 text overlay, background music, and a closing frame.

COMPETE Format (3:00 – 3:30)

- All reels played back to back on the projector. Class votes: Best Story Hook / Best Edit / Most Entertaining.
- Top 3 reels posted on Focsera Labs Instagram page (with student and parent consent).

SESSION 05**Superpower Comic Strip**

Badge: Story Artist

Tools: Canva

Objective: Students create a 4-panel comic strip about themselves discovering a superpower, using Canva comic templates.

TEACH Block (0:20 – 1:00)

- Show 5 classic comic strip panels (Peanuts, Tintin, Indian comics). Explain the anatomy: panel, speech bubble, action lines, expression.
- Teach: How a good comic tells a 4-beat story — Setup → Problem → Action → Resolution.
- Demonstrate in Canva: How to use comic layout templates, add characters, change expressions, add speech bubbles, and colour scenes.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer builds Panel 1 and Panel 2 live. Students follow along. Panel 1: Normal day → Panel 2: Discover the superpower.
- Independent (2:00–3:00): Students complete all 4 panels. Panel 3: Use the superpower to solve a problem. Panel 4: Funny or surprising consequence.
 - Must include: Student's name somewhere in the comic, at least 1 speech bubble per panel, colour throughout.

COMPETE Format (3:00 – 3:30)

- All comics printed and pinned on a class board. Class walks around and votes using sticker dots: Funniest Comic / Best Drawing / Most Creative Story.
- All comics compiled into a Class Superpower Book PDF and shared with every parent via WhatsApp.

SESSION 06

Talk to an AI — Prompt Lab

Badge: AI Whisperer

Tools: ChatGPT, Canva AI

Objective: Students learn what AI is, how to write effective prompts, and complete 5 AI challenges that produce useful, creative results.

TEACH Block (0:20 – 1:00)

- Open ChatGPT on projector. Ask a vague prompt: 'Tell me something interesting.' Get a mediocre result. Ask: 'Why wasn't that great?'
- Teach the basics of prompt writing — be specific, give context, say what format you want.
- Show the transformation: Bad prompt vs improved prompt for the same task. Students see immediately how the output changes.
- Explain: AI is a tool, not magic. It needs good instructions — just like telling a friend exactly what you want.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer does Challenge 1 live: 'Write a fun bio for a student who loves cricket and drawing.' Students improve the prompt together.
- Independent (2:00–3:00): Students complete all 5 challenges:
 - Challenge 1 — Write your school bio using AI. Compare with your own written bio.
 - Challenge 2 — Ask AI to write a funny joke about your city. Rate the result and improve the prompt until it's funny.
 - Challenge 3 — Ask AI to plan your dream birthday party. Include theme, food, and 5 activities.

- Challenge 4 — Use Canva AI to generate an image using a detailed prompt. Refine it twice.
- Challenge 5 — Ask AI to explain a school subject you find difficult, but explain it like a story.

COMPETE Format (3:00 – 3:30)

- Students share their best AI output (any challenge) on the projector. Class votes: Most Creative Prompt / Most Useful Result / Most Surprising Output.
- Winner earns the 'AI Whisperer' badge. Top prompts printed and displayed on the class wall.

SESSION 07

Badge: Brand Founder

Logo Design for Dream Brand

Tools: Canva

Objective: Students invent a brand name and tagline, then design a logo in Canva and deliver a 60-second pitch to the class.

TEACH Block (0:20 – 1:00)

- Show logos of 10 famous brands: Apple, Nike, McDonald's, Amul, Flipkart, Zomato. Ask: what does each logo make you feel?
- Teach: Logo design principles — Simplicity (one clear idea), Meaning (hidden stories in logos), Colour (what each colour signals to buyers).
- Show bad logos: overcrowded, too many fonts, low contrast. Show great logos and explain the design choices.
- Teach in Canva: How to use shapes to build a logo, how to pick 2-colour palettes, how to use negative space.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer designs a sample logo for a fictional brand live. Students pick a brand idea and write: Brand Name, What it sells, 1-line tagline.
- Independent (2:00–3:00): Students design their logo in Canva. Also prepare a 60-second pitch: What is the brand? Who is it for? Why is the logo designed that way?

COMPETE Format (3:00 – 3:30)

- Shark Tank style — each student presents their logo and gives their 60-second pitch. Class acts as 'investors' and votes on which brand they'd buy from.
- Top 3 logos printed and displayed. Winners receive the 'Brand Founder' certificate.

SESSION 08

Badge: Sticker Star

Custom Sticker Pack Studio

Tools: Canva, Phone Camera

Objective: Students design a 5-sticker pack featuring their own face expressions or original characters.

TEACH Block (0:20 – 1:00)

- Show famous sticker packs: WhatsApp default stickers, Bitmoji, Korean character stickers. Ask: What makes a sticker pack popular?
- Teach: Sticker rules — transparent background, bold outlines, exaggerated expressions, limited colour palette (3–4 colours max).

- Demonstrate in Canva: How to remove background from a photo using Canva's background remover, add a thick stroke outline, resize for sticker dimensions.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer creates Sticker 1 live — takes a selfie, removes background, adds outline, adds a caption text. Students follow along.
- Independent (2:00–3:00): Students create their 5-sticker pack. Each sticker should show a different emotion or situation.

■ Sticker ideas: Happy / Angry / Confused / Laughing / Studying Mode / Weekend Mode / Monday Mode.

COMPETE Format (3:00 – 3:30)

- All sticker packs compiled and displayed. Class votes: Most Expressive / Most Original Character / Best Colour Palette.
- Winning pack converted into actual WhatsApp stickers and distributed to the whole class.

SESSION 09

YouTube Thumbnail Battle

Badge: Thumbnail King

Tools: Canva

Objective: Students understand click psychology and create 2 thumbnail versions of the same topic — one bad, one great.

TEACH Block (0:20 – 1:00)

- Show 5 pairs of thumbnails for the same video. Ask: Which one would you click? Why?
- Teach the Click Formula: Big bold text (5 words max) + High contrast colours + Emotional face or surprising visual + Clear topic.
- Show real YouTube channel analytics to explain how thumbnails affect views. A great thumbnail can double the clicks.
- Demonstrate in Canva: YouTube thumbnail template (1280x720), bold typography, drop shadows, colour blocks.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer builds one 'bad' thumbnail live — too much text, dull colours. Then rebuilds it as a 'great' one. Students analyse the change.
- Independent (2:00–3:00): Students pick a topic they love (sport, game, food, travel). Create Version A (bad) intentionally, then Version B (great).

COMPETE Format (3:00 – 3:30)

- A/B test in class: Both thumbnails shown side by side. Class votes which one they would click. Most convincing 'Version B' wins.
- Winners receive the 'Thumbnail King/Queen' badge.

SESSION 10

AI Art Exhibition — India in 2075

Badge: AI Visionary

Tools: Canva AI, ChatGPT

Objective: Students write detailed AI image prompts and generate artwork imagining India 50 years into the future.

TEACH Block (0:20 – 1:00)

- Show 10 AI-generated artworks on the projector. Discuss: what makes AI art interesting? What can't AI do that humans can?
- Teach: How adding detail to prompts changes results dramatically. Show 3 versions of the same prompt — vague to very specific.
- Explain: Prompt structure for image generation — Subject + Style + Mood + Lighting + Details. E.g. 'A futuristic Mumbai street market at sunset in a Studio Ghibli style with neon lights and flying vehicles.'

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer writes 3 prompts live for 'India in 2075' — each more detailed. Class votes which output is the most interesting.
- Independent (2:00–3:00): Students write at least 3 different prompts and generate images for each. Select their best final image and write a 2-line caption explaining what they imagined.

COMPETE Format (3:00 – 3:30)

- Top 10 artworks printed A4 and displayed in the school corridor as an actual art gallery. School community votes with sticker dots for their favourite.
- Best artwork wins the 'AI Visionary' badge.

SESSION 11

Badge: Young Filmmaker

Mini Documentary — My School Story

Tools: CapCut, Phone Camera

Objective: Groups of 3 students plan, film, and edit a 90-second mini-documentary about a person or place in their school.

TEACH Block (0:20 – 1:00)

- Play 2 short documentaries (90 seconds each) on the projector. Ask: How did the filmmaker make you care about the subject?
- Teach: Documentary structure — Opening hook (10 sec) → Who/What is it? (20 sec) → Interview/Story (40 sec) → Closing thought (20 sec).
- Teach: How to interview someone naturally — sit them by a window, tell them to look at you not the camera, ask open questions.
- Teach basic camera shots: Wide shot (establishes location), Mid shot (shows the person), Close-up (emotion and detail), B-roll (supporting footage).

PRACTICE Exercise (1:00 – 3:00)

- Groups of 3 form. Each group chooses a subject: a teacher, the school canteen, the garden, the library, the school entrance.
- Guided (1:00–1:20): Groups plan their film — write 3 interview questions, decide on opening shot and closing line.
- Independent filming (1:20–2:30): Groups go out and film. Trainer rotates between groups to give live direction.
- Editing (2:30–3:00): Groups edit in CapCut — trim, arrange clips, add title text, add background music.

COMPETE Format (3:00 – 3:30)

- All mini-docs screened on projector. Teachers and students vote: Best Story / Best Camera Work / Best Interview.
- Winners receive the 'Young Filmmaker' certificate. Best documentary screened at the next school assembly.

SESSION 12

Badge: Design Maker

Festival Poster Design Sprint

Tools: Canva

Objective: Students design a festival poster for an upcoming school event or Indian festival that meets a real design brief.

TEACH Block (0:20 – 1:00)

- Show 8 festival poster examples: Diwali, Eid, Christmas, Independence Day, Holi, Pongal, Onam, Republic Day. Ask: What design choices represent each festival?
- Teach: Festive design language — Colour symbolism (red/gold for Diwali, green/white for Eid), Traditional motifs (rangoli, diyas, stars).
- Teach: Poster hierarchy — Event name must be largest, date second, school name third, tagline smallest.
- Show: How to find and use free illustration packs in Canva for each festival.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer designs a sample Diwali poster live using Canva's festival templates and custom elements.
- Independent (2:00–3:00): Students pick an upcoming festival and design the poster. Must include school name and actual event date.

COMPETE Format (3:00 – 3:30)

- School principal or coordinator reviews all posters and selects top 3. Those posters are actually printed and used as school decoration for the festival.
- Students whose designs are used receive a real-world achievement certificate: 'My design was used by the school.'

SESSION 13

Badge: Type Artist

Typography Art — One Word About Me

Tools: Canva

Objective: Students choose one word that defines them and turn it into a full visual artwork using only typography.

TEACH Block (0:20 – 1:00)

- Show 10 examples of typography-as-art: word clouds, kinetic typography, 3D type, illustrated letters. Ask: how does each one make you feel?
- Teach: What makes typography art — the letter form itself becomes the visual. No photos needed.
- Teach: Font personality — Serif (traditional, trustworthy), Sans-serif (clean, modern), Script (creative, personal), Display (dramatic, expressive).

- Demonstrate in Canva: How to stack large type, change individual letter colours, add textures behind letters, overlap type layers.

PRACTICE Exercise (1:00 – 3:00)

- Students write 3 words that describe them. Choose 1 final word.
- Guided (1:00–1:45): Trainer builds a type artwork for the word 'CREATE' live — layering, sizing, colour blocking.
- Independent (2:00–3:00): Students create their full typography artwork. Encourage experimenting with size, rotation, and colour.

COMPETE Format (3:00 – 3:30)

- All artworks printed A4. Pinned on the class board for a gallery walk. Class votes: Most Powerful Word / Most Creative Layout / Most Beautiful Colour Use.
- Every student takes their printed artwork home as a gift for parents. Top 3 receive the 'Type Artist' badge.

SESSION 14

Badge: Fan Artist

My Favourite Book / Movie — Fan Poster

Tools: Canva

Objective: Students design a custom fan poster for a book or movie they love, capturing its mood, theme, and emotion.

TEACH Block (0:20 – 1:00)

- Show 8 official movie/book posters: Harry Potter, Bahubali, Avengers, Chhichhore, RRR, Jungle Book. Ask: how does each poster make you feel before you see the film?
- Teach: Movie poster anatomy — Title, tagline, central image, mood colour palette, billing block at bottom.
- Teach: Mood design — dark dramatic backgrounds for thrillers, bright warm colours for adventure, muted tones for emotional stories.
- Show how to recreate a poster style in Canva using photos, overlays, and typography.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer designs a sample fan poster for a popular film live, explaining each design decision.
- Independent (2:00–3:00): Students create their fan poster. Must include: Title, 1-line tagline, central image or illustration, and a mood background.

COMPETE Format (3:00 – 3:30)

- Gallery display on projector. Class votes: Most Faithful to the Story / Best Visual Mood / Most Creative Reimagining.
- Top 3 printed and displayed. Students share their posters with parents via the Drive folder.

SESSION 15

Badge: Heart Designer

Design a Greeting Card — For Someone You Love

Tools: Canva

Objective: Students design and print a personalised greeting card for someone they care about — parent, friend, sibling, or teacher.

TEACH Block (0:20 – 1:00)

- Show 10 greeting cards: Birthday, Thank You, Get Well, Friendship, Congratulations. Ask: what makes a card feel personal and meaningful?
- Teach: Card design rules — Front (visual, minimal text), Inside (personal message, space to breathe), Back (branding or a small logo).
- Teach: How to fold A4 into a card in Canva — use the presentation or A4 template, design it in 4 panels.
- Show: How to use handwriting fonts, watercolour textures, and illustration elements to make a card feel warm and personal.

PRACTICE Exercise (1:00 – 3:00)

- Students decide who the card is for and what they want to say.
- Guided (1:00–1:45): Trainer designs a birthday card front and inside live. Students follow for the front panel.
- Independent (2:00–3:00): Students design all four panels — front, inside left (illustration), inside right (message), back.

COMPETE Format (3:00 – 3:30)

- All cards printed and displayed. Class votes: Most Beautiful Design / Most Heartfelt Message / Most Creative Concept.
- All students take their printed card home to give to the person it was made for. This is the WOW moment — parents receive a real, physical creation.

SESSION 16

Stop Motion Short — Bring Objects to Life

Badge: Stop Motion Director

Tools: CapCut, Phone Camera

Objective: Students create a 15-second stop motion animation using classroom objects — pencils, erasers, books, stationery.

TEACH Block (0:20 – 1:00)

- Play 5 short stop motion videos on the projector — from simple (pencils moving) to complex (Lego films). Ask: how many photos do you think that took?
- Teach: How stop motion works — one frame at a time, consistent lighting, camera stays fixed, objects move tiny amounts between each shot.
- Teach: The Stop Motion Rule — 12 frames per second minimum. For 15 seconds, students need at least 180 photos. Keep moves very small.
- Demonstrate: Fix the phone on a stack of books or against a wall. Set up 4 objects. Take 20 photos with tiny movements. Import to CapCut and set each photo to 0.05s. Watch it move.

PRACTICE Exercise (1:00 – 3:00)

- Groups of 2. Each group sets up their 'studio' on a desk: plain paper as background, 4–6 objects, phone mounted steady.
- Guided (1:00–1:30): Trainer does the first 20-frame practice run with the class.

- Independent (1:30–2:30): Groups film their full 15-second story. Story must have: a beginning, something happening, and an ending.
- Editing (2:30–3:00): Import frames to CapCut, set speed, add a title and background music.

COMPETE Format (3:00 – 3:30)

- All stop motion films screened on projector. Class votes: Smoothest Animation / Most Creative Story / Best Sound Design.
- Top 3 films uploaded to the Focsera Labs YouTube channel. Winners receive the 'Stop Motion Director' badge.

SESSION 17

Badge: Info Designer

Infographic — Fun Facts About My City

Tools: Canva

Objective: Students research 8–10 interesting facts about Hyderabad (or their city) and present them as a visually engaging infographic.

TEACH Block (0:20 – 1:00)

- Show 5 infographics on the projector — one bad (just text on a page) and four great ones. Ask: why does the visual version work better?
- Teach: Infographic rules — One fact per block, use icons not photos, use consistent colours throughout, lead with the most surprising fact.
- Teach in Canva: How to use the infographic templates, how to swap icons from the Elements panel, how to keep a consistent colour palette across all blocks.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:20): Trainer and class together search for 3 surprising facts about Hyderabad using Google. Trainer builds the first 2 infographic blocks live.
- Independent (1:20–3:00): Students research their 8 facts and design the full infographic — title, 8 fact blocks with icons, colour theme, sources at the bottom.

COMPETE Format (3:00 – 3:30)

- All infographics displayed. Class votes: Most Surprising Facts / Cleanest Design / Best Use of Icons and Colour.
- Top infographic submitted to the school newsletter or bulletin board. Winner receives the 'Info Designer' badge.

SESSION 18

Badge: Ad Director

One-Minute Ad for Anything

Tools: CapCut, Phone Camera

Objective: Students write a script, shoot, and edit a 60-second ad for any ordinary school object — making it look premium and desirable.

TEACH Block (0:20 – 1:00)

- Play 5 iconic Indian ads: Amul, Fevicol, Asian Paints, Cadbury, Surf Excel. After each: 'What emotion did that ad make you feel?'

- Teach: Ad anatomy — Problem (30 sec) → Solution shown (20 sec) → Call to action (10 sec). Great ads sell feelings, not features.
- Teach: How to make any object look premium — close-up shots, slow motion, dramatic music, confident voiceover.

PRACTICE Exercise (1:00 – 3:00)

- Students pick their object: pencil, eraser, water bottle, school bag, geometry box, ruler.
- Guided (1:00–1:30): Trainer writes a sample ad script live for a pencil. Class suggests improvements.
- Independent (1:30–3:00): Students write script, shoot 5–8 clips, edit in CapCut with voiceover or text overlay, add dramatic music.

COMPETE Format (3:00 – 3:30)

- All ads screened. Class votes: Would You Buy This? (yes/no). Most convincing ad wins the 'Best Director' award.
- Top 3 ads posted on Focsera Labs Instagram. Students share on their own WhatsApp status (with parent consent).

SESSION 19

Time Capsule Reel — Letter to Future Me

Badge: Time Keeper

Tools: CapCut, Phone Camera

Objective: Students film a heartfelt message to their future self at age 25, to be sealed in a digital folder and opened at graduation.

TEACH Block (0:20 – 1:00)

- Play 2 examples of video letters — one from a young adult to their older self, one from a creator reflecting on their younger years.
- Teach: Video diary format — Look directly at the camera, speak naturally, no script-reading, pause for thought, be honest.
- Teach: How to use CapCut to add a vintage film grain filter, soft background music, and a title frame: 'A letter to myself — Opened in 2033'.
- Prompt students to think about: What are you proud of today? What do you hope has changed by 25? What would surprise your future self?

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:30): Trainer films their own 60-second letter live as a demonstration. Class gives feedback on presence and authenticity.
- Students write a 5-point outline — not a full script. Just 5 things they want to say.
- Independent (1:30–3:00): Each student films their 2-minute letter. Coordinator helps set up good lighting for each student individually.
- Students edit in CapCut: add title frame, film grain filter, gentle music, closing frame with the year.

COMPETE Format (3:00 – 3:30)

- Class votes (after watching a 20-second clip from each): Most Honest / Most Inspiring / Most Emotional.
- All videos sealed in a private shared Drive folder labelled 'DO NOT OPEN UNTIL 2033'. Folder link given to parents.

SESSION 20

Badge: Creator of the Year

Focsera Labs Creator Showcase

Tools: All Tools

Objective: Students curate their best 5 works from the year and present them at the annual showcase event to parents, teachers, and guests.

TEACH Block (0:20 – 1:00)

- This session begins differently — students run the class as the experts. Trainer introduces a guest speaker (a local creator or designer).
- Guest speaker shares their creative journey in 15 minutes. Students ask 5 questions they prepared in advance.

PRACTICE Exercise (1:00 – 3:00)

- Students select their best 5 works from the year's Google Drive folder and arrange them into a Canva portfolio PDF.
- Each work gets a 2-line caption: What I made + What I learned from it.
- Students set up their personal exhibition station — printed portfolio, 3 printed works displayed, and a 60-second verbal introduction prepared.

COMPETE Format (Showcase Event — 3:00 – 4:00)

- Parents invited. Students present their stations. Parents and teachers walk around like a gallery.
- Grand award ceremony: Creator of the Year (all grades), Best Poster, Best Reel, Best AI Art, Best Comic, Best Ad.
- Annual certificates signed by school principal and Focsera Labs director handed out on stage. Every student gets a stage moment.

SECTION 08

Curriculum — Classes 8, 9 & 10

Skill Development · 20 Sessions · 4 Terms · 4 Hours Each

Focus: Real tools, industry thinking, and practical outputs. Students move from 'I made something' to 'I know how this works professionally.'

Sessions build on each other — by Session 20, every student has a professional-grade digital portfolio.

SESSION 01

AI Tools Masterclass — Prompting Like a Pro

Badge: Prompt Engineer

Tools: ChatGPT, Canva AI

Objective: Students learn the RICE prompt formula and complete 5 AI challenges covering writing, design, research, and problem-solving.

TEACH Block (0:20 – 1:00)

- Open ChatGPT on projector. Ask a terrible prompt: 'Write something.' Get a useless answer. Ask: why did that fail?
- Teach the RICE formula — Role: tell AI who it is. Instruction: tell it exactly what to do. Context: give background. Example: show it a sample output.
- Live demo: Transform the bad prompt step by step using RICE. Show how each addition dramatically improves the result.
- Teach: AI for design — how Canva AI image generation works, how to write detailed visual prompts for specific outputs.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer does Challenge 1 live, using RICE to build the prompt collaboratively with the class.
- Independent (2:00–3:00): Students complete all 5 challenges:
 - Challenge 1 — Write a product description for a fictional gadget. Compare RICE vs basic prompt results.
 - Challenge 2 — Summarise a chapter from any school textbook in 5 bullet points using AI.
 - Challenge 3 — Generate a weekly study schedule for Board exams using AI. Customise it until it's genuinely useful.
 - Challenge 4 — Write a business idea pitch using AI. Prompt it to add market size and competition analysis.
 - Challenge 5 — Use Canva AI to generate a logo concept for the business idea from Challenge 4.

COMPETE Format (3:00 – 3:30)

- Prompt battle: All students given the same task. Best AI output wins. Judged on creativity, accuracy, and usefulness. Winner earns 'Prompt Engineer' badge.

SESSION 02

Badge: Cut Master

Video Editing Sprint — CapCut Pro Techniques

Tools: CapCut, DaVinci Resolve

Objective: All students receive identical raw footage and must edit it into a 45-second finished video, each with a unique approach.

TEACH Block (0:20 – 1:00)

- Play 3 versions of the same raw footage — one unedited, one basic, one professional edit. Ask: what's different in each?
- Teach 5 editing techniques: Jump Cut (remove dead air), L-Cut (audio continues after video cut), Colour Grading (mood through colour), Text Animation (kinetic typography), J-Cut (audio from next scene starts early).
- Demonstrate in CapCut: How to apply a colour filter, add animated text, sync cuts to music beats, and use the speed ramp.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer edits the first 15 seconds of the shared footage live, step by step, applying 3 of the 5 techniques.
- Independent (2:00–3:00): Students edit the full 45-second video using all 5 techniques. Each student's edit must feel distinctly different.
 - Required: Colour grade applied, at least 2 text animations, audio balanced, opening title card, closing name card.

COMPETE Format (3:00 – 3:30)

- Same raw footage — 20+ different edits screened back to back on projector. Blind voting: class scores each out of 5 for 3 criteria: Mood / Pacing / Creativity.
- Highest-scoring edit wins the 'Cut Master' badge.

SESSION 03

Badge: Art Director

Graphic Design Fundamentals — CARP Principles

Tools: Canva

Objective: Students learn the 4 design principles (Contrast, Alignment, Repetition, Proximity), redesign a bad flyer, and create an original event poster.

TEACH Block (0:20 – 1:00)

- Show a purposely terrible flyer on the projector. Ask: What's wrong? Students call out problems.
- Teach CARP: Contrast (make important things stand out), Alignment (nothing placed randomly), Repetition (consistent fonts/colours), Proximity (related items grouped).
- Show the same flyer redesigned using CARP. Go through each principle and show exactly what changed and why.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer and class redesign the bad flyer together in Canva, applying one CARP principle at a time.
- Independent (2:00–3:00): Students design an original A4 event poster for a fictional school event — Sports Day, Talent Show, Science Fair, Cultural Fest.

- Must demonstrate all 4 CARP principles. Must include: event name, date, venue, tagline, and visual.

COMPETE Format (3:00 – 3:30)

- Posters displayed on projector. Anonymous judging by class: which poster would make you actually attend this event?
- Best poster printed A3 and displayed in class corridor for a week. Winner earns 'Art Director' badge.

SESSION 04

Content Creation Strategy — Cracking the Algorithm

Badge: Content Strategist

Tools: Canva, ChatGPT

Objective: Students learn how social media algorithms work and build a 5-post content calendar for a niche they choose.

TEACH Block (0:20 – 1:00)

- Open Instagram and YouTube on projector. Ask: why do some creators get millions of views and others don't?
- Teach: How the algorithm works — the first 3 seconds (hook), watch time, saves and shares matter more than likes, posting consistency.
- Teach: Content pillars — every creator needs 3 categories they consistently post about. Show examples of niche creators: study tips, cooking, cricket, fashion.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer and class pick a niche together (school life tips). Build the first post together — hook, caption, format.
- Independent (2:00–3:00): Each student picks their niche and builds a 5-post content calendar: Post topic, Hook line (first sentence), Format (reel/carousel/image), Caption draft.

COMPETE Format (3:00 – 3:30)

- Niche pitch battle — each student pitches their content plan in 60 seconds. Class votes on which account they'd follow immediately.
- Winner earns the 'Content Strategist' badge. Their content plan featured in Focsera newsletter.

SESSION 05

Social Media Audit — Fix a Real Account

Badge: Brand Auditor

Tools: Canva, Google Docs

Objective: Students audit a real local business Instagram account, identify 5 specific problems, and create a full improvement plan.

TEACH Block (0:20 – 1:00)

- Open a real local business Instagram on projector (with permission). Ask: would you follow this account? What's wrong?
- Teach: Profile audit framework — Bio (is it clear?), Grid consistency (do posts look related?), Post frequency (how often?), Engagement rate (how many comments per post?), Call to action (what do they want people to do?).
- Show before/after examples of accounts that improved by fixing these 5 elements.

PRACTICE Exercise (1:00 – 3:00)

- Each student picks 1 real local business Instagram account (restaurant, tuition center, clothing store, salon).
- Guided (1:00–1:30): Trainer audits a sample account live using the 5-point framework.
- Independent (1:30–3:00): Students write a full audit report in Google Docs: Current Profile Review (what's wrong) + Improvement Plan (what to fix) + Sample redesigned bio + 3 content post ideas.

COMPETE Format (3:00 – 3:30)

- Best audit pitched to class in 90 seconds. If the business is a local one, Focsera actually sends the winning audit to the real business owner.
- Winner earns 'Brand Auditor' badge.

SESSION 06

UI/UX Intro — Design an App Screen

Badge: UX Designer

Tools: Figma, Canva

Objective: Students learn the difference between UI and UX, and design a home screen and one inner screen for an app idea.

TEACH Block (0:20 – 1:00)

- Open 3 popular apps: Swiggy, Google Maps, Instagram. Ask: why is Swiggy easy to use? What happens when an app is confusing?
- Teach: UI vs UX — UI is how it looks, UX is how it feels to use. Bad UX loses users in the first 10 seconds.
- Teach: UX principles — Every screen needs 1 main action. Buttons must look like buttons. Text must be readable. Navigation must be obvious.
- Demonstrate: How to wireframe on paper first (box sketches), then build in Canva using the mobile frame template.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer designs an app home screen live for a fictional Study Planner app. Class suggests what buttons and content to include.
- Independent (2:00–3:00): Students choose an app idea (bus tracker, canteen ordering, school event calendar, sports scoreboard). Design home screen + 1 inner screen.
 - Each screen must include: Navigation bar, at least 3 buttons, app name, appropriate icons.

COMPETE Format (3:00 – 3:30)

- App screens presented in 60 seconds as a mini investor pitch: 'This is my app, here's what it does, here's why it's easy to use.'
- Class rates usability + design out of 10. Top 3 receive the 'UX Designer' badge.

SESSION 07

Podcasting — Record a Real Episode

Badge: Voice Creator

Tools: Spotify for Podcasters, CapCut

Objective: Pairs of students record a 3-minute podcast episode on a topic they genuinely care about.

TEACH Block (0:20 – 1:00)

- Play 3 clips from real podcasts: one amateur (bad audio, rambling), one mid-level, one professional. Ask: what separates them?
- Teach: Podcast structure — Intro (name, topic, hook: 30 sec) → Main content (2 min) → Closing and what's next (30 sec).
- Teach: Audio quality tips — speak 15cm from mic, avoid background noise, don't read the script, maintain steady pacing, use deliberate pauses.
- Teach: How to record using a phone with voice recorder or CapCut, add background music, and export as MP3.

PRACTICE Exercise (1:00 – 3:00)

- Pairs form. Each pair chooses a topic they both care about: school food, cricket, gaming, fashion, climate, career dreams.
- Guided (1:00–1:30): Trainer and coordinator record a demo episode live. Class critiques it using the audio quality checklist.
- Independent (1:30–2:30): Pairs write a simple outline (not a script), rehearse once, then record.
- Editing (2:30–3:00): Add intro music, trim dead air, balance audio levels in CapCut.

COMPETE Format (3:00 – 3:30)

- Blind listening — class hears all episodes without knowing who made them. Votes: Most Confident Voices / Best Topic / Best Chemistry Between Hosts.
- Top episode released on Focsera Labs Spotify podcast channel. Hosts receive the 'Voice Creator' badge.

SESSION 08

Badge: Problem Solver

Design Thinking — Solve a Real School Problem

Tools: Canva, Google Slides

Objective: Groups of 3 go through all 5 stages of Design Thinking and pitch a prototype solution to a real school problem to school management.

TEACH Block (0:20 – 1:00)

- Show a real Indian startup that solved a familiar problem using design thinking: Swiggy (ordering food), OYO (booking hotels), Namma Yatri (auto rides).
- Teach the 5 steps: Empathise (understand the user's pain), Define (state the exact problem), Ideate (generate 10+ ideas), Prototype (build a quick model), Test (show it to people and get feedback).
- Show real student design thinking projects from previous schools as examples.

PRACTICE Exercise (1:00 – 3:00)

- Groups pick a real school problem: canteen queue is too long, school lost-and-found is chaotic, homework tracking is messy, students don't know the school events calendar.
- Guided (1:00–1:30): Trainer walks through Empathise + Define together with the class for a sample problem.
- Independent (1:30–2:45): Groups go through all 5 steps, building a visual prototype in Canva or physical sketch.
- Prep (2:45–3:00): Groups prepare their 3-minute pitch.

COMPETE Format (3:00 – 3:30)

- Groups pitch to school management or a teacher panel — real audience, real problem. Management votes on which solution they'd like to actually implement.
- Winning group receives the 'Problem Solver' badge. Their solution potentially implemented by the school.

SESSION 09

Badge: Brand Architect

Brand Identity Design — Full Brand Kit

Tools: Canva

Objective: Students create a complete brand identity kit for their own imaginary startup — logo, colour palette, typography, tagline, and brand voice.

TEACH Block (0:20 – 1:00)

- Deconstruct 3 real Indian brand kits live: Amul, Nykaa, and CRED. Show exactly what each includes and why every decision was made.
- Teach: A brand kit includes — Logo (primary + alternate), Colour palette (primary + secondary + neutral), Typography (headline font + body font), Tagline, Brand voice (formal/casual/playful).
- Explain: Why consistency across all formats (poster, social media, packaging) builds trust with customers.

PRACTICE Exercise (1:00 – 3:00)

- Guided (1:00–1:45): Trainer builds a complete brand kit for a fictional sustainable fashion brand live.
- Independent (2:00–3:00): Students build their own brand kit for an original startup idea in Canva.
 - Must include: Logo, 4-colour palette, 2 fonts, tagline, brand voice description, and 1 sample social media post using the brand.

COMPETE Format (3:00 – 3:30)

- Brand kits judged like a real agency review: Consistency (5), Originality (5), Market Fit (5). Scored out of 15.
- Top 3 featured in Focsera 'Student Brand Gallery' on the website. Winners receive 'Brand Architect' badge.

SESSION 10

Badge: Young Filmmaker

Short Film — 3-Minute Story Challenge

Tools: CapCut, Phone Camera

Objective: Groups of 4 write a 1-page script, assign roles, film, and edit a 3-minute short film with a clear beginning, conflict, and resolution.

TEACH Block (0:20 – 1:00)

- Screen 2 award-winning 3-minute student short films. Ask: how did they make you care about the characters in 3 minutes?
- Teach: Film grammar — Wide shot (establish location), Medium shot (character actions), Close-up (emotion), Over-the-shoulder shot (dialogue).
- Teach: 3-minute story structure — Setup 30 sec (who, where, what's normal) → Conflict 90 sec (something goes wrong) → Resolution 60 sec (how it ends).

PRACTICE Exercise (1:00 – 3:00)

- Groups of 4: Director, Camera Operator, Lead Actor, Sound/Music Editor.
- Guided (1:00–1:20): Trainer walks through script format with the whole class using a sample story.
- Independent (1:20–2:30): Groups write their 1-page script (location must be within school), assign roles, and film.
- Editing (2:30–3:00): Director and editor assemble in CapCut. Add title, music, and credits.

COMPETE Format (3:00 – 3:30)

- Mini film festival — all films screened in class. Awards: Best Story / Best Actor / Best Cinematography / Best Edit.
- Winning film screened at school assembly. Posted on Focsera Labs YouTube channel.

Sessions 11–20: Classes 8–10 — Detailed Overview

Each of the following sessions follows the identical 4-hour structure. The TEACH, PRACTICE, and COMPETE breakdown for each is described below.

SESSION 11

Motion Graphics — Animated Social Post

Badge: Art Director

Tools: Canva, CapCut

TEACH Block (0:20 – 1:00)

- Teach: Animation principles — timing, easing, entrance/exit effects.
- Show 5 animated Instagram posts.
- Demonstrate in Canva animations panel..

PRACTICE Exercise (1:00 – 3:00)

- Guided: Trainer animates a 3-element slide live.
- Independent: Students animate a 15-second social media post about a topic they care about using Canva animations or CapCut keyframes..

COMPETE Format (3:00 – 3:30)

- All animated posts played on loop.
- Top 5 posted on Focsera Instagram as a collaboration reel.
- Winner: 'Motion Designer' badge..

SESSION 12

Data Storytelling — Numbers into Visuals

Badge: Info Architect

Tools: Canva, Piktochart

TEACH Block (0:20 – 1:00)

- Teach: Why data storytelling matters — show the same data as a boring table vs a stunning infographic.
- Teach 4 chart types: Bar (compare), Line (trend), Pie (proportion), Icon array (human data)..

PRACTICE Exercise (1:00 – 3:00)

- Students given a real dataset (IPL stats / Indian population data / social media growth).
- Guided: Trainer builds the first 2 chart blocks live.
- Independent: Students design a full 8-block data infographic with title and source..

COMPETE Format (3:00 – 3:30)

- Infographics judged: Does it tell a story? Is it clear? Is it beautiful? Scores out of 15.
- Top infographic submitted to school newsletter..

SESSION 13

Copywriting Lab — Words That Sell

Badge: Chief Copywriter

Tools: Google Docs, ChatGPT

TEACH Block (0:20 – 1:00)

- Teach: AIDA formula (Attention, Interest, Desire, Action) and PAS formula (Problem, Agitation, Solution).
- Show 10 famous Indian taglines.
- Explain headline writing — numbers, questions, and power words..

PRACTICE Exercise (1:00 – 3:00)

- Students write all 4 pieces for a single fictional product: 3 headline options, a 50-word Instagram caption, a 6-word tagline, and a 100-word ad script.
- Use ChatGPT to compare their version vs AI's version..

COMPETE Format (3:00 – 3:30)

- Blind copy battle — class reads headlines and votes which made them want to buy.
- Winner's copy used in a real Focsera social post.
- Badge: 'Chief Copywriter'..

SESSION 14

YouTube Strategy — Plan a Real Channel

Badge: Channel Strategist

Tools: Canva, Google Sheets

TEACH Block (0:20 – 1:00)

- Teach: YouTube growth mechanics — SEO basics (titles and descriptions matter), thumbnail click-through, playlists, and community posts.
- Show a real channel's analytics growth spike and explain what caused it..

PRACTICE Exercise (1:00 – 3:00)

- Each student designs a complete YouTube channel from scratch: Channel name and niche, banner design in Canva, first 10 video title ideas with thumbnail sketches, and a 4-week posting schedule..

COMPETE Format (3:00 – 3:30)

- Channel concepts pitched in 90 seconds.
- Class votes on which channel they'd subscribe to immediately.
- Best plan featured in Focsera newsletter.
- Badge: 'Channel Strategist'..

SESSION 15

Photography + Editing — Magazine Cover Shoot

Badge: Cover Star

Tools: Phone Camera, Snapseed, Canva

TEACH Block (0:20 – 1:00)

- Teach: Professional portrait photography — lighting setup with phone (face the window), posing direction (chin down slightly, look past the camera), background selection.
- Editing: exposure, contrast, colour grading in Snapseed..

PRACTICE Exercise (1:00 – 3:00)

- Students work in pairs — one photographs the other, then swap.
- Each student edits their portrait in Snapseed, then designs a magazine cover in Canva using their edited photo.
- Must include: Magazine name, headline article, barcode..

COMPETE Format (3:00 – 3:30)

- All magazine covers printed A4 and displayed on the 'Focsera Labs Cover Wall' in the corridor.
- Best cover wins 'Cover Star' award.
- Displayed for the full term..

SESSION 16

Startup Pitch — Solve a Problem in Your City

Badge: Young Entrepreneur

Tools: Canva, Google Slides

TEACH Block (0:20 – 1:00)

- Teach: What is a startup — show 5 real Indian startups and the problems they solved.
- How great pitch decks work — 5 slides: Problem / Solution / How it works / Who uses it / How we reach them.
- Shark Tank India clip analysis..

PRACTICE Exercise (1:00 – 3:00)

- Groups of 3 identify a real local problem in Hyderabad.
- Build a 5-slide pitch deck.
- Guided: Trainer walks through slide 1 (problem) and slide 2 (solution) live.
- Independent: Groups build all 5 slides and rehearse a 3-minute pitch..

COMPETE Format (3:00 – 3:30)

- Shark Tank format — 3-minute pitch, 2-minute Q&A; from a teacher panel.
- Winner invited to pitch at Focsera Creator Fest.
- Badge: 'Young Entrepreneur'..

SESSION 17

Personal Branding — Build Your Online Presence

Badge: Brand Builder

Tools: Canva, Instagram

TEACH Block (0:20 – 1:00)

- Teach: What personal branding means at age 14–16.
- Why it matters.

- Finding your niche (what you love + what you're good at + what people need).
- How to craft a bio that tells people exactly who you are and why to follow..

PRACTICE Exercise (1:00 – 3:00)

- Students build their personal brand kit in Canva: Profile photo frame, 3-line optimised bio, 3 content pillars, personal tagline, and 3 highlight cover designs.
- Guided: Trainer builds their own sample brand kit live..

COMPETE Format (3:00 – 3:30)

- Brand kits reviewed by a guest creator or influencer invited by Focsera.
- Top 3 most compelling brands get a 1:1 virtual mentorship session.
- Badge: 'Brand Builder'..

SESSION 18

Ad Film Production — 60-Second Commercial

Badge: Ad Film Director

Tools: CapCut, Phone Camera

TEACH Block (0:20 – 1:00)

- Teach: Ad film anatomy — emotion hook (0–5 sec), product reveal (5–30 sec), call to action (30–60 sec).
- Deconstruct 3 iconic Indian ads: Fevicol, Asian Paints, Amul.
- Teach storyboarding — 6 boxes, one per key shot..

PRACTICE Exercise (1:00 – 3:00)

- Groups of 4 receive a real local brand brief from Focsera (actual small business).
- Write a script, draw a storyboard, film all scenes, and edit a complete 60-second commercial.
- Every person must appear or have a role..

COMPETE Format (3:00 – 3:30)

- The real client watches all ads and picks their favourite live.
- That ad gets used by the business on their Instagram.
- Winning team receives a client testimonial letter for their portfolio..

SESSION 19

Portfolio Day — Curate Your Year's Work

Badge: Portfolio Pro

Tools: Canva, Google Drive

TEACH Block (0:20 – 1:00)

- Teach: What a portfolio is and why it matters more than marks for a creative career.
- Show real student portfolios that led to internships.
- Teach the portfolio rule: quality over quantity — 5 best works is better than 20 average ones..

PRACTICE Exercise (1:00 – 3:00)

- Each student reviews all work saved in their Drive folder.

- Selects 5 best pieces.
- Writes a 2-line case study for each: What I made + What I learned.
- Assembles everything into a professional digital portfolio PDF in Canva..

COMPETE Format (3:00 – 3:30)

- Portfolio review by a guest designer or agency professional.
- Top 3 most impressive portfolios added to Focsera Labs website as a permanent link.
- Badge: 'Portfolio Pro'..

SESSION 20

Focsera Labs Industry Expo + Awards Night

Badge: Creator of the Year

Tools: All Tools

TEACH Block (0:20 – 1:00)

- This session is the showcase event.
- Students run their own stations and explain their work to parents, teachers, and guests.
- A guest speaker from a real design agency or startup opens the event with a 10-minute talk..

PRACTICE Exercise (1:00 – 3:00)

- Full expo setup — portfolios, brand kits, short films, ad campaigns, UI designs all on display with QR codes linking to digital work.
- Each student presents their station to at least 5 visitors..

COMPETE Format (3:00 – 3:30)

- Awards across 8 categories: Best Designer, Best Filmmaker, Best Strategist, Best Copywriter, Best Podcast, Best UI, Best Brand, Creator of the Year.
- Annual certificates handed out on stage..

SECTION 09

Curriculum — Classes 11 & 12

Career Launch · 20 Sessions · 4 Terms · 4 Hours Each

Focus: Industry-level skills, real clients, and career-ready portfolios. By Session 20, every student has a professional portfolio and real-world creative experience.

Classes 11–12 sessions involve real clients, real deadlines, and real consequences — students present to actual business owners, industry professionals, and live audiences.

SESSION 01

Advanced Video Editing — Cinematic Storytelling

Badge: Cinematographer

Tools: DaVinci Resolve, CapCut

TEACH Block (0:20 – 1:00)

- Teach cinematic editing techniques — J-cuts (audio from next scene starts before the cut), L-cuts (audio from previous scene continues), Match cuts (continuity through similar shapes or motions), Colour grading with LUTs (cinematic colour looks), and Sound design layering (ambient, music, effects).
- Play a 60-second raw clip and then the cinematic version.
- Students identify every technique used..

PRACTICE Exercise (1:00 – 3:00)

- Guided: Trainer applies each technique to the first 20 seconds of a shared raw clip.
- Independent: Students edit a 60-second cinematic reel about someone they admire — family member, teacher, or local hero.
- Must use colour grade, at least 3 advanced cuts, and layered sound design..

COMPETE Format (3:00 – 3:30)

- Reels screened cinema-style (lights low, projector at full brightness).
- Judged by trainer as creative director: Emotion (5) + Technique (5) + Story (5).
- Top reel posted on Focsera YouTube.
- Badge: 'Cinematographer'..

SESSION 02

UI/UX Design — Build a Full App Prototype

Badge: UX Architect

Tools: Figma, Canva

TEACH Block (0:20 – 1:00)

- Teach the full UX design process: User personas (who is using this app and why), User journey mapping (what does the user do step by step), Wireframes (rough box layouts), High-fidelity mockups (detailed visual designs), and Clickable prototypes in Figma.

- Show a real app prototype built by a student team..

PRACTICE Exercise (1:00 – 3:00)

- Guided: Trainer builds user persona and journey map for a hypothetical exam prep app.
- Independent: Each student designs a 5-screen clickable app prototype for a real problem — bus tracking, exam prep, local event finder, school canteen ordering.
- Must include: Home, Feature screen, Profile, Settings, and one detail screen..

COMPETE Format (3:00 – 3:30)

- Prototypes tested by classmates who try to complete a task without guidance — pure usability test.
- Best prototype invited to be showcased at a real Hyderabad startup event.
- Badge: 'UX Architect'..

SESSION 03

Prompt Engineering — Build an AI-Powered Tool

Badge: AI Builder

Tools: ChatGPT, Canva AI

TEACH Block (0:20 – 1:00)

- Teach advanced prompting — chain-of-thought (tell AI to think step by step), role prompting (you are an expert in X), few-shot examples (here are 3 examples of what I want), and system instructions (setting behaviour for the whole conversation).
- Teach prompt chaining for multi-step tasks: one prompt feeds into the next..

PRACTICE Exercise (1:00 – 3:00)

- Guided: Trainer builds a Caption Writer AI tool live using prompt chaining.
- Independent: Each student builds their own custom AI tool using prompts only — study buddy, business name generator, caption writer, debate coach, meal planner, or fitness guide.
- Must include at least 3 chained prompts working together..

COMPETE Format (3:00 – 3:30)

- Tools tested blind by classmates who rate usefulness out of 10.
- Top 3 tools published on Focsera Labs website as free student-built AI tools.
- Badge: 'AI Builder'..

SESSION 04

Startup Ideation — From Problem to Business Model

Badge: Young Founder

Tools: Canva, Google Slides

TEACH Block (0:20 – 1:00)

- Teach the Business Model Canvas — all 9 blocks explained with real Indian startup examples: Zepto (key resources and rapid delivery), Blinkit (customer segments), and Meesho (value proposition for resellers).
- Show how to fill the canvas in under 30 minutes for a new idea..

PRACTICE Exercise (1:00 – 3:00)

- Guided: Trainer and class fill the canvas together for a fictional app.
- Independent: Each student fills a complete Business Model Canvas for their own original startup idea, then builds a 1-page 'Startup Brief' document: problem, solution, target customer, revenue model, and 3 competitors..

COMPETE Format (3:00 – 3:30)

- 60-second elevator pitch to a panel of 2 guest entrepreneurs.
- Best idea gets a signed letter of encouragement and featured in Focsera newsletter.
- Badge: 'Young Founder'..

SESSION 05**Freelancing Basics — Get Your First Client**

Badge: Freelance Pro

Tools: Canva, Google Docs

TEACH Block (0:20 – 1:00)

- Teach what freelancing looks like at age 17 — what skills students can already offer (graphic design, video editing, social media management, content writing, AI prompting).
- How to price services, where to find clients (Instagram DMs, LinkedIn, local businesses, school events).
- How to write a proposal that gets a yes..

PRACTICE Exercise (1:00 – 3:00)

- Guided: Trainer writes a sample service proposal live for a graphic design package.
- Independent: Students create their freelance service package — 3 service tiers with pricing, a client outreach WhatsApp message, and a one-page service menu in Canva.
- Must look professional..

COMPETE Format (3:00 – 3:30)

- Mock client scenario — trainer plays a difficult business owner.
- Students pitch their services.
- Best pitch wins a real micro-project from Focsera as their first paid client.
- Badge: 'Freelance Pro'..

SESSION 06**Personal Branding — LinkedIn + Portfolio Setup**

Badge: LinkedIn Creator

Tools: Canva, LinkedIn

TEACH Block (0:20 – 1:00)

- Teach why Class 11 students should be on LinkedIn now — show profiles of 17-year-olds who got internships through LinkedIn.
- Teach headline writing (not just 'Student at XYZ School'), about section (tell a story not a resume), skills section, and how to write a first LinkedIn post..

PRACTICE Exercise (1:00 – 3:00)

- Every student sets up or optimises their LinkedIn profile live in class: headline, about section, skills, professional photo, and first LinkedIn post drafted.
- Guided: Trainer builds their own sample profile improvements live.
- Independent: Students complete all profile sections..

COMPETE Format (3:00 – 3:30)

- Trainer reviews all profiles and picks top 3.
- Those profiles get shared by Focsera Labs official LinkedIn page, giving real reach to real professionals.
- Badge: 'LinkedIn Creator'..

SESSION 07

Advanced Graphic Design — Brand Campaign

Badge: Campaign Designer

Tools: Canva, DaVinci Resolve

TEACH Block (0:20 – 1:00)

- Teach what a brand campaign is vs a single post — one consistent message expressed across multiple formats.
- Show how Zomato, Swiggy, and Dunzo run campaigns: same visual language, same colour, same tone across Instagram posts, stories, reels, posters, and outdoor.
- Teach visual consistency rules..

PRACTICE Exercise (1:00 – 3:00)

- Guided: Trainer designs the first 2 pieces of a campaign for a local Hyderabad brand.
- Independent: Students design a 5-piece campaign for a local brand — Instagram post, story, reel cover, A4 poster, and billboard mockup.
- All pieces must look like they belong to the same campaign..

COMPETE Format (3:00 – 3:30)

- Agency pitch format — present the campaign in 3 minutes as if presenting to the brand's marketing team.
- Guest judge from a real design agency gives live feedback.
- Badge: 'Campaign Designer'..

SESSION 08

Documentary Making — 5-Minute Social Impact Film

Badge: Impact Filmmaker

Tools: CapCut, Phone Camera

TEACH Block (0:20 – 1:00)

- Teach social impact documentary structure — how to tell a real story about a real issue with empathy and data.
- How to film real people: ask permission, brief them, let them speak naturally.
- How to weave b-roll footage with interviews.
- Teach the emotional arc: problem → human face of the problem → hope or call to action..

PRACTICE Exercise (1:00 – 3:00)

- Groups of 3 pick a real issue in their community: stray animals, water waste, street vendors, school dropouts, air quality.
- Go out and film real people and places.
- Return and edit a 5-minute documentary in CapCut..

COMPETE Format (3:00 – 3:30)

- Screened at a school event with parents and community members present.
- Winning documentary submitted to 2 real student film festivals in India.
- Badge: 'Impact Filmmaker'..

SESSION 09**Content Monetisation — How Creators Make Money**

Badge: Brand Ambassador

Tools: Canva, Google Sheets

TEACH Block (0:20 – 1:00)

- Teach all monetisation models creators use: Brand deals (sponsored posts), AdSense (YouTube revenue share), Online courses, Merchandise, Paid communities, Affiliate marketing, and Freelance services.
- Show real income figures from Indian creators..

PRACTICE Exercise (1:00 – 3:00)

- Guided: Trainer builds a sample monetisation plan for a gaming channel.
- Independent: Each student builds a monetisation plan for their personal brand — pick 2 revenue streams, calculate realistic monthly income at different follower counts, design a rate card for brand collaborations..

COMPETE Format (3:00 – 3:30)

- Mock brand collaboration pitch — trainer plays a brand manager.
- Student pitches why the brand should work with them, at what rate, and what the deliverable will be.
- Scored on confidence, rate justification, and creativity.
- Badge: 'Brand Ambassador'..

SESSION 10**Public Speaking + Presentation Design**

Badge: Speaker Champion

Tools: Canva, Google Slides

TEACH Block (0:20 – 1:00)

- Teach TED Talk structure — one big idea, personal story, data point, another story, call to action.
- Teach slide design for speeches: one idea per slide, visuals over text, no bullet points.
- Teach vocal presence: pace, pause, volume variation, eye contact, and what to do with your hands..

PRACTICE Exercise (1:00 – 3:00)

- Each student picks one idea they genuinely believe in.
- Builds a 5-slide presentation.
- Delivers a 3-minute talk standing in front of the class.
- Trainer gives individual coaching on voice, pacing, and stage presence before the competition round..

COMPETE Format (3:00 – 3:30)

- Talks recorded on video.
- Top 3 talks uploaded to Focsera YouTube.
- Best speaker invited to open Focsera Creator Fest in front of 200+ parents.
- Badge: 'Speaker Champion'..

SESSION 11

Advanced Copywriting — Full Marketing Campaign

Badge: Copy Director

Tools: Google Docs, ChatGPT

TEACH Block (0:20 – 1:00)

- Teach campaign copywriting — how one core message becomes 10 different pieces.
- Show how Amul uses one tagline across TV, newspaper, social, and outdoor.
- Teach the process: core message → audience → format adaptation → tone adjustment for each platform..

PRACTICE Exercise (1:00 – 3:00)

- Students pick a real Hyderabad brand.
- Write a full mini campaign from one core message — Instagram caption, Facebook ad headline, billboard copy, email subject line, and WhatsApp push notification.
- Must maintain a consistent voice across all 5 formats..

COMPETE Format (3:00 – 3:30)

- Copy reviewed by a real marketing professional (guest).
- They select the single best piece from the whole class.
- Winner's copy potentially used in a real brand campaign.
- Badge: 'Copy Director'..

SESSION 12

Podcast Series — Launch a 3-Episode Show

Badge: Podcast Producer

Tools: Spotify for Podcasters, CapCut

TEACH Block (0:20 – 1:00)

- Teach how to build a podcast series — show concept (not just topics), episode arc (how episodes connect), guest strategy (who to invite and why), distribution plan, cover art design, and Spotify for Podcasters setup..

PRACTICE Exercise (1:00 – 3:00)

- Pairs plan and record 3 short episodes — 5 minutes each.
- Each episode must connect thematically.
- Design cover art in Canva, write descriptive episode titles, and upload all 3 episodes to Spotify under Focsera Labs channel..

COMPETE Format (3:00 – 3:30)

- After 2 weeks live on Spotify, shows compared by listener count.
- Top show featured in Focsera newsletter with 1000+ readers.
- Winners receive 'Podcast Producer' badge..

SESSION 13

Growth Hacking — Take a Brand from 0 to 1000

Badge: Growth Hacker

Tools: Canva, Instagram, Google Sheets

TEACH Block (0:20 – 1:00)

- Teach growth hacking vs traditional marketing — viral loops (refer a friend, get a reward), influencer seeding (send product to 10 micro-creators), community building (WhatsApp groups, Discord), hashtag strategy, and the power of before-and-after content..

PRACTICE Exercise (1:00 – 3:00)

- Groups of 3 assigned a real dormant local business account (pre-agreed with business owner).
- They plan and execute a 4-week growth strategy with a full content calendar: 3 posts per week, theme for each week, engagement tactics..

COMPETE Format (3:00 – 3:30)

- After 4 weeks, real follower growth compared across all groups.
- Most followers gained wins the 'Growth Hacker' trophy.
- Business owner gives a real testimonial that students can use in their portfolio..

SESSION 14

AI Tools for Professionals — Full Workflow

Badge: AI Director

Tools: ChatGPT, Canva AI, ElevenLabs, Runway

TEACH Block (0:20 – 1:00)

- Teach the modern professional AI stack: ChatGPT (writing and strategy), Canva AI (design and images), ElevenLabs (AI voiceover), Runway ML (AI video generation and background removal).
- Show how a solo creator can replace a 5-person team using these tools together..

PRACTICE Exercise (1:00 – 3:00)

- Students build a complete content piece using only AI tools — AI-written script in ChatGPT, AI-generated visuals in Canva AI, AI voiceover using ElevenLabs, AI-edited short clip using Runway, and AI-designed thumbnail in Canva..

COMPETE Format (3:00 – 3:30)

- Blind judging — class rates each piece as if from a professional creator, without knowing it was fully AI-made.
- Best AI-produced piece wins 'AI Director' badge..

SESSION 15**Portfolio Building — Case Study Workshop**

Badge: Portfolio Expert

Tools: Canva, Google Drive

TEACH Block (0:20 – 1:00)

- Teach what separates a good portfolio from a great one — case studies vs just showing work.
- Teach the case study format: Problem (what was needed), Role (what I did), Process (how I approached it), Solution (what I made), Result (what happened).
- Show real student portfolios that got internships..

PRACTICE Exercise (1:00 – 3:00)

- Students write 3 case studies for their 3 best projects.
- Each case study must follow the format above and be written clearly enough that someone who has never seen the work understands what was done and why it matters.
- Assembled as a professional portfolio PDF in Canva..

COMPETE Format (3:00 – 3:30)

- Portfolio reviewed by a guest from a design college, media company, or agency.
- Top 3 most college-application-ready portfolios added to Focsera Labs website permanently.
- Badge: 'Portfolio Expert'..

SESSION 16**Internship Readiness — Resume, Interview, Outreach**

Badge: Career Ready

Tools: Canva, Google Docs

TEACH Block (0:20 – 1:00)

- Teach creative resume design vs standard resume — why a one-page visual resume stands out.
- How to write a cold outreach email that gets replies (subject line + personalised opener + clear ask + portfolio link).
- How to prepare for a creative internship interview: portfolio walkthrough, handling tough questions, what to ask the interviewer..

PRACTICE Exercise (1:00 – 3:00)

- Each student designs a one-page creative resume in Canva, writes a cold outreach email to a real company of their choice (actually researching the company's work), and records a 2-minute 'tell me about yourself' video that they can review..

COMPETE Format (3:00 – 3:30)

- Mock interviews conducted by trainer or guest HR professional.
- Top 2 students get an actual warm introduction from Focsera to a partner company for a real internship.

- Badge: 'Career Ready'..

SESSION 17

Live Client Project — Real Brand, Real Deliverable

Badge: Client Champion

Tools: All Tools

TEACH Block (0:20 – 1:00)

- Teach how professional client relationships work — understanding the brief (don't assume, ask questions), revision rounds (every client will want changes), feedback loops (how to present work professionally), delivery (file formats, naming, handover), and what to do when a client hates your work..

PRACTICE Exercise (1:00 – 3:00)

- Focsera brings in a real local business with a real creative brief.
- Groups of 3 receive the brief, ask the client clarifying questions, execute the full brief from concept to final delivery in one 4-hour session.
- This is a real deadline with a real client watching..

COMPETE Format (3:00 – 3:30)

- Client selects the winning team live.
- That team's work gets used by the business.
- Winning team gets a signed client testimonial letter for their portfolio.
- Badge: 'Client Champion'..

SESSION 18

TEDx-Style Talk — Your Idea Worth Spreading

Badge: TEDx Speaker

Tools: None (speaking only)

TEACH Block (0:20 – 1:00)

- Teach what makes a TEDx-worthy idea — specific (not general), counterintuitive (challenges a common belief), actionable (people can do something after hearing it), and personal (your story makes it real).
- Teach full talk structure with emotional arc.
- Show top 3 Indian TEDx talks and analyse structure..

PRACTICE Exercise (1:00 – 3:00)

- Students write and rehearse a full 5-minute talk on an idea they believe in.
- No slides — just the speaker.
- Trainer coaches on memorisation (not word for word — know the 5 key points), eye contact, movement, and ending strongly.
- At least 2 full rehearsals per student..

COMPETE Format (3:00 – 3:30)

- Talks delivered in front of the full school — parents, juniors, teachers, management.
- Best speaker gets nominated to apply for a real TEDx Youth event in Hyderabad.

- Badge: 'TEDx Speaker'..

SESSION 19

Career Roadmap — Map the Next 5 Years

Badge: Future Planner

Tools: Canva

TEACH Block (0:20 – 1:00)

- Teach creative career paths in 2025 that pay well: UX designer, content creator, brand strategist, filmmaker, copywriter, AI specialist, podcast producer, growth hacker.
- Share real salary data and growth paths for each.
- Emphasise: skills compound — what you learn in Classes 11–12 becomes your first income..

PRACTICE Exercise (1:00 – 3:00)

- Each student builds a personalised 5-year career roadmap as a visual in Canva: Year 1 (skill deepening), Year 2 (first income), Year 3 (portfolio strength), Year 4 (specialisation), Year 5 (first full-time role or business).
- Must include specific milestones and skills to learn in each year..

COMPETE Format (3:00 – 3:30)

- Roadmaps shared in class.
- Each student presents their plan in 90 seconds.
- Most ambitious and most realistic are both celebrated.
- Roadmaps kept as a personal commitment document given to parents.
- Badge: 'Future Planner'..

SESSION 20

Focsera Labs — Career Launch Night

Badge: Creator of the Year

Tools: All Tools

TEACH Block (0:20 – 1:00)

- Guest panel of a designer, filmmaker, entrepreneur, and copywriter.
- Each speaks for 5 minutes.
- Students moderate the panel — they researched the guests in advance and ask all the questions.
- This gives students real industry conversation experience..

PRACTICE Exercise (1:00 – 3:00)

- Full portfolio expo — every student has a station with printed portfolio, digital portfolio with QR code, and their own business card.
- Short films screened on one projector, podcasts played at a listening station, AI artworks and campaigns displayed on boards..

COMPETE Format (3:00 – 3:30)

- 8 career-track awards: Best Designer, Best Filmmaker, Best Strategist, Best Writer, Best Speaker, Best AI Creator, Best Entrepreneur, Creator of the Year.
- Top 3 students receive warm introductions to Focsera partner network for internships or real client projects..

SECTION 10

Student Activities & Assessment

Output-based evaluation that encourages participation, not fear.

Assessment Philosophy

Focsera Labs does not use written exams. Assessment is output-based — students are evaluated on what they make, not what they memorise. Every session produces a tangible output. The quality of that output is the assessment.

Assessment Methods

Method	Description	Judged By	Outcome
Peer Voting	Class votes anonymously on the best work in each session	Classmates	Winner Badge
Trainer Review	Creative director-style feedback on technique and quality	Trainer	Written Note
Public Display	Work displayed in school corridor or on social media	School Community	Recognition + Reach
Client Selection	Real business or principal selects the best output	External Client	Real-World Use
Guest Judge	Industry professional reviews and scores selected works	Professional	Certificate + Feedback
Portfolio Score	End-of-year holistic review of all work produced	Trainer + Guest	Portfolio Certificate

Scoring Rubric

Dimension	1 — Needs Work	2 — Developing	3 — Strong	4 — Exceptional
Creativity	Copied template	Some original choices	Clear original concept	Surprising and memorable
Execution	Incomplete or broken	Complete but with errors	Clean and technically solid	Polished to pro standard
Effort	Minimal, disengaged	Participated but didn't push	Fully engaged, all tasks done	Went beyond the brief

How We Encourage Every Student

- 3 winner categories per session — not just one winner
- Celebrate 'Most Improved' every term
- Recognise consistent attendance
- Give a Participation Badge to all attending students
- Let peers nominate, not just the trainer
- Show progress over time, not rank vs rank

SECTION 11

Certification & Badges

A structured recognition system that motivates students throughout the year.

Badge System — Session Level

Every session has a specific badge that the winner earns. Badges are both digital and printed. Students collect them across the year. A student with 10+ badges earns a 'Master Creator' title at the grand annual showcase.

Badge Name	Earned By	Session	Grade Level
Brand Founder	Best logo + 60-sec brand pitch	Logo Design Session	Classes 6–7, 8–10
Sharp Shooter	Best composition in photography session	Phone Photography Bootcamp	Classes 6–7
AI Whisperer	Most creative AI use	Prompt Lab	Classes 6–7
Young Filmmaker	Best short documentary	Mini Documentary	Classes 6–7, 8–10
Type Artist	Best typography artwork	Typography Art Session	Classes 6–7
Reel Maker	Best story reel	30-Second Story Reel	Classes 6–7
Prompt Engineer	Winner of AI prompt battle	AI Tools Masterclass	All Grades
Cut Master	Best video edit from same footage	Video Editing Sprint	Classes 8–10
Art Director	Best graphic design / event poster	CARP Design Session	Classes 8–10
Content Strategist	Best niche content plan pitch	Content Strategy Session	Classes 8–10
UX Designer	Best app screen design	UI/UX Intro	Classes 8–10, 11–12
Campaign Designer	Best brand campaign (5 pieces)	Advanced Design Session	Classes 11–12
Impact Filmmaker	Best social impact documentary	Documentary Session	Classes 11–12
Growth Hacker	Most real follower growth	Growth Hacking Session	Classes 11–12
AI Director	Best fully AI-produced content	AI Workflow Session	Classes 11–12
TEDx Speaker	Best 5-minute talk delivery	TEDx-Style Talk	Classes 11–12
Creator of the Year	Overall best creator across all sessions	Grand Showcase	All Grades

Certificate Levels

Certificate	Awarded When	Who Receives It
Session Certificate	After every completed session. Signed by trainer.	All attending students
Term Certificate	End of each term — students who attended 80%+ sessions.	Consistent students
Annual Certificate of Completion	Year-end showcase. Full program completion.	All completing students
Certificate of Excellence	Top performers — Creator of the Year and category winners.	Top performers only
Portfolio Certificate (11 & 12)	Professional-grade portfolio reviewed by an industry professional.	Classes 11 & 12 Top 3

Sample Certificate

FOCSERA LABS
 Certificate of Completion

This is to certify that

[Student Name]

has successfully completed the Focsera Labs Future Skills Program
demonstrating exceptional commitment to learning, creating, and competing.

Course	Grade	Year	Certificate No.
[Course Name]	[Grade]	2024–25	FL-2025-XXXX

Program Trainer

SECTION 12

Operations & Management

Clear roles, smooth execution, and transparent communication.

What Focsera Provides

- Trained, vetted professional trainer for every Saturday session
- Session coordinator for logistics, photography, and coordination
- Full session curriculum, content, materials, and workbooks
- Photography and videography during every session
- Social media reels, posts, and content creation every week
- Badges and certificates (printed and digital) for all students
- Monthly impact reports for school management
- Annual showcase event planning and execution
- Focsera-branded backdrop, props, and printed materials

What School Provides

- A computer lab with projector and whiteboard access on Saturdays
- Basic WiFi connectivity (Focsera carries backup hotspot)
- A school point of contact (POC) for coordination
- Student list and grade-wise attendance on event day
- Collection of program fee from students/parents at admission

Communication Flow

Frequency	Format	Recipient	Content
Weekly	WhatsApp Message	School Coordinator	Session summary, attendance, badge winners, 3 best photos
Monthly	PDF Impact Report	School Principal	Attendance data, highlights, social reach, next month preview
Per Term	In-person Meeting	Principal + Management	Term data, feedback, showcase planning
Annually	Parent Showcase Event	Parents + Community	Student work display, highlights video, annual awards
Emergency	Call within 30 min	School Coordinator	Any issue — trainer absent, equipment fail, student concern

SECTION 13

Media & Branding Support

Every session is a content opportunity — for Focsera and for your school.

What We Capture Every Session

- Wide classroom shot during the TEACH block — shows the program environment
- Close-up of student working on their device — shows real engagement
- The COMPETE moment — peer voting, announcement, student reactions
- Winner holding their certificate or badge — the pride shot
- Group photo of all students with session theme if available
- 3 short video clips (15 seconds each) for reel compilation

Content Published Every Week

Content Type	Format	Frequency	Goal
Session Reel	30–45 sec CapCut reel with trending audio	Every session (weekly)	Reach + Discovery
Student Spotlight	Student + best work + quote post	2× per month	Trust + Emotion
Before / After	Split screen — skill before vs after training	Monthly	Proof of Learning
Badge / Certificate Moment	Winner announcement video clip	Every session	Aspiration
School Feature	Focsera Labs Partner post tagging the school	Monthly per school	School Promotion
Creator Fest Hype	Countdown posts, teaser videos	6 weeks before event	Event Awareness

What Your School Gets

- Ready-made photos and reels sent every Monday for your school's social media
- Your school tagged in every Focsera Labs post — free visibility for your institution
- Student work displayed in school corridors — a physical gallery of excellence
- One post per term featuring your school principal with students
- Your school positioned as a forward-thinking, innovation-focused institution

SECTION 14

Annual Showcase Event

Focsera Creator Fest — the grand celebration of a year of skill-building.

What is the Creator Fest?

The Focsera Creator Fest is the annual culmination event where students from all grade groups showcase their year's work to parents, teachers, school management, and invited guests. It is a 3-hour celebration of creativity, skills, and student achievement.

What Happens at Creator Fest

- Student-run exhibition stations — each student explains their best work to visitors
- Full-year portfolio display — printed booklets + digital portfolios with QR codes
- Short films, animated posts, and ad films screened on a projector
- Podcast episodes played at a dedicated listening station
- AI art gallery and brand kit display boards in school corridors
- Guest speaker — a real working creator, designer, or entrepreneur from the city
- Grand awards ceremony — 8 award categories across grade groups
- Stage moment for every student receiving their annual certificate
- Parents vote for 'Best Creator of the Year' across 5 categories

Award Categories at Creator Fest

Award	What It Recognises	Grade Level
Best Designer	Most outstanding graphic design work across the year	All Grades
Best Filmmaker	Best video, documentary, or reel produced	All Grades
Best Strategist	Best content plan, campaign, or growth strategy	Classes 8–12
Best Copywriter	Most compelling written or spoken copy	Classes 8–12
Best Podcast	Most engaging podcast episode or series	Classes 8–12
Best UI Designer	Best app screen or UX prototype	Classes 8–12
Best Entrepreneur	Best startup idea or business pitch	Classes 11–12
Creator of the Year	Overall best creator across all sessions and categories	All Grades

SECTION 15

Pricing & Value

Transparent, parent-funded, zero cash outflow from the school budget.

How the Fee Works

The program fee is collected from students and parents at the time of school admission — as part of the school's annual activity or enrichment program fee. Schools collect the fee from parents and remit Focsera's program fee from the collected amount. There is no direct cash outflow from the school's operational budget.

Plan	Fee per Student	Sessions	Session Duration	Payment
Basic Starter	Rs. 1,500 – 2,000	5 Sessions	4 Hours Each	Once at admission
Standard Skill Program	Rs. 3,000 – 3,500	15 Sessions	4 Hours Each	Once at admission
Premium Innovation	Rs. 4,500 – 5,000	20 Sessions	4 Hours Each	Once at admission

What the Fee Covers

- Professional trainer for every 4-hour Saturday session
- Session coordinator for logistics and photography
- Full curriculum, content, and session workbooks and materials
- Badges and printed certificates for winning students
- Photography and social media reels from every session
- Monthly impact reports for school management
- Annual Creator Fest showcase (Premium plan)
- Digital portfolio for every student (all plans)
- IT setup visit before Session 01 (all plans)

There are no hidden costs, no extra payments, and no mid-year surprises. One fee. One year. One program that delivers real, visible results for every student.

SECTION 16

Focsera Labs Branding Kit

A physical welcome kit that makes every student feel part of something real.

What is the Branding Kit?

The Focsera Labs Branding Kit is a curated physical kit given to every enrolled student at the start of the program. It is designed to build excitement, identity, and belonging from Day One. Students arrive at their first session to find a kit waiting for them — branded, packed, and ready to open.

Kit Contents

Item	Description	Used In Sessions
Focsera Branded Paper Bag	The kit arrives in a well-designed, branded paper carry bag. Students use it to carry their printed works home after sessions.	Every session
Skill Workbook	A session-by-session workbook with warm-up prompts, notes sections, and portfolio tracking pages. A4, 50 pages, spiral-bound.	Every session
Focsera Pen	Branded ball pen with Focsera Labs logo. Used for workbook exercises, sketching, and note-taking.	Every session
Focsera Wear (T-shirt or Cap)	Branded Focsera Labs T-shirt or cap. Students wear this on session days — builds team identity and makes for great session photos.	Session days
Goodies Pack	Includes: Focsera sticker sheet (10 stickers), badge holder + lanyard for physical badges, Focsera Labs thank-you card.	Ongoing
Personalised Welcome Card	A card with the student's name printed on it, a welcome message from Focsera, and the session calendar for the year.	Session 01

Premium Plan students receive the complete Branding Kit free — this is a core part of the Premium value. Basic and Standard students can purchase the kit separately at Rs. 499–699 per student, collected at enrollment.

SECTION 17

Safety & Discipline

A safe, structured, and respectful environment for every student.

Student Safety Measures

- All Focsera trainers and coordinators are background-checked working professionals
- Sessions are conducted only in school premises — no off-campus activities without prior written approval
- A school-designated staff member is always available on-site during sessions
- Student photographs are shared only with the school and with parental consent
- No student personal data is collected beyond name, class, and school
- All online content featuring students is published with appropriate privacy measures

Classroom Discipline Guidelines

- Phone usage is permitted only during designated activity time — not during TEACH blocks
- Trainers follow a structured session plan — sessions do not run beyond the allocated time slot
- No ranking or comparison of students is done publicly — assessment focuses on growth
- Students are encouraged to compete in a positive, constructive spirit
- Any behavioural concern is reported immediately to the school's designated POC

Responsible Device Usage

Students use devices only for the session's skill activity. Trainers actively monitor screen time and ensure all usage is appropriate and on-task. Social media posting of student work is done by Focsera coordinators — not students — to ensure responsible, age-appropriate content sharing.

SECTION 18

Let's Partner

Contact & Partnership

We are looking for schools that believe in building students who create, not just students who memorise. If you want your students to leave school with a portfolio, a skill set, and the confidence to compete in the real world — Focsera Labs is built for your school.

- 01 Share this handbook with your school management team
- 02 Schedule a 30-minute walkthrough with our team
- 03 Run a pilot session — see the student response first-hand
- 04 Partner with Focsera Labs for the full academic year
